高性能温度传感器 -Moving Surface 移动表面用-

Contact support type 接触辅助型

NEW

SX series

As the head part can be tilted, the temperature sensing part follows and closely contacts the object to be measured, making temperature measurement easier.

By restricting the movement of one side of the contact plate, it reduces the deformation of the contact plate due to unexpected small deposits or distortion on the surface of the object to be measured.

Suitable for measurement of high temperature metal surface during movement such as during rolling process.

头部可摆动接触辅助功能可以使感温部与被测物密切接触，可更简单的测量温度。感温片一侧固定在头部的轴上，减少了感温片由于意外的小沉积物或被测物表面不规则而导致的变形。
适合钢板热压等移动过程中的高温金属表面的温度测量。

Contact support function 接触辅助功能

Camera shake when contacting a moving surface will be reduced.
减少接触移动中被测物时的姿势误差。
